

CITY-CHECK WATER TESTING PRODUCTS

City-Check Basic

The City-Check Basic package tests for the most commonly found contaminants in municipal water supplies. This would include: 5 metals/minerals, 6 inorganic chemicals, 4 physical characteristics and 16 disinfection and disinfection by-products including chlorine, trihalomethanes and haloacetic acids.

City-Check Standard

The City-Check Standard package is a more comprehensive version of the City-Check Basic package. This package tests 17 metals/minerals, 6 inorganic chemicals, 4 physical characteristics, 16 disinfection and disinfection by-products and 47 volatile organic compounds.

City-Check Deluxe

The City-Check Deluxe package tests for all contaminants listed in both the City-Check Basic and City-Check Standard packages. This package adds a group of 20 pesticides, herbicides and PCBs. Pesticides and herbicides are more likely to be present in municipal water supplies that use surface water as their primary water source.
