National Testing Laboratories, Ltd. Achieves ISO 17025:2005 Accreditation

Cleveland, OH – November 1, 2011 – National Testing Laboratories, Ltd. announced today that its Drinking Water Testing facility located in Ypsilanti, Michigan is now accredited to ISO/IEC 17025:2005. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system.

ISO 17025:2005 is the international standard by which a laboratory's commitment to quality is evaluated. National Testing Laboratories, Ltd. achieved this accreditation by demonstrating technical competence for the environmental testing of drinking water. ISO 17025:2005 not only considers the management and technical expertise, but also emphasizes continuous process improvement.

“Achieving ISO 17025:2005 accreditation is further evidence that National Testing Laboratories, Ltd. is committed to providing high quality testing for our customers” said Robert W. Gelbach, Owner and President.

According to Stephen Tischler, Vice President, “ISO 17025:2005 was identified as a key objective in our strategic planning process and achieving the accreditation was a direct result of hard work and dedication by the entire laboratory staff. This achievement allows us to open our business to new markets and business opportunities.”

About National Testing Laboratories, Ltd.:

National Testing Laboratories is one of the largest independent laboratories in the U.S. specializing in the analysis of drinking water for chemical and microbiological contamination. The corporate office in Cleveland, Ohio is integral to the operation of our laboratory facility: National Testing Laboratories, Ltd. in Ypsilanti, Michigan. Since 1985, we have offered a wide range of services for residential and commercial customers. Commercial customers include public water systems, environmental consultants, engineers, water treatment professionals, bottled water plants, well drillers, food producers, pharmaceutical companies, laboratories and home inspectors.
